

VERTICAL FIBER CONNECTOR CURING OVEN

Fiber optic connector curing oven is equipment for the heating adhesive, and solidify fiber cables to manufacture fiber patch cords, pigtails. The Vertical fiber connector curing oven realizes massive connector solidification with good, effective performance.

It can adjust the temperature according to the epoxy characteristics and worker working habits.

Features

- Precise temperature control system, vertically heating
- Suitable for FC, SC , ST, LC, MU, MT, MPO connector curing
- Can ensure the glue evenly in the ferrule
- Maximum 300 connector to be cured
- OEM service provided
- Temperature ranging from 0-200degree, precision control $\pm 1^{\circ}\text{C}$
- Easy to operate for various connectors

Parameter:

1. Voltage: AC220V 20/ 60Hz1000W
2. Temperature Adjustment: 50-200 degree
3. Size:380*360*100mm
4. Weight:10KG
