Outdoor Fiber Terminal Box 144F

The outdoor fiber terminal box FO144 is designed for massive fiber cable splicing ,patching and passive component integration to be mounted on walled or pole. It is designed with 8 open cable ports for cable loop through with waterproof material to have IP54.

Features

➢ Flame retardant, impact resistant engineering plastic, IP54 waterproof

➢ Can be locked with key or side hasp

➢ With a metal comb and hose clamp to fix the cable

➢ Wall mounted, pole mounted, suitable for harsh environment

➢ Suitable for micro PLC splitters 1x8, 1x16, 1x32

Technical Parameters

Item	Parameter
Model	IP 54
Installation Way	Wall mounted, pole mounted,
Splicing point	144c fiber max, 6pcs 12/24 splice tray
Entry Ports for Cable diameter	8*φ15mm
Dimension	329*286*108
Seal Material of box	EPDM
Seal material of the port	rubber
Flame resistance	V0
